Our Philosophy:

We are honest people who tell the truth about our equipment, capabilities, capacity and ability to meet deadlines. We strive for integrity in every endeavor - the quality of our character is reflected in workmanship and business principles

Die Sets:

Integrity Fab & Machine, Inc. (IFABM) specializes in custom dies sets, plate and parallels. Our focus on customer service, prompt delivery and industry leading attention to the quality of our products assure your complete satisfaction. The team at IFABM strives to provide the best cutting, grinding, machining and packaging on every die set and plate order.

Weldments and Fabrications:

IFABM's ability to fabricate and machine in-house gives us a leg up on competition. Our team of certified welders supports our ability to assist customers with the design and processing of their special weldments and fabrications. IFABM has the ability to cut, bend, roll, weld, sand blast, machine, prime and paint all under one roof.

Special Machining Service:

IFABM has a complete line-up of machines ready to serve your job shop needs. From water jet cutting, to a CNC lathe and multitude of CNC machining centers, we can prove one off parts to large production runs. IFABM can work with Solid Works, Auto Cad, STEP files and DWG to create a CNC program using the latest Master Cam software. Contact an IFABM customer service representative via e-mail or telephone to discuss all details.

Engineering & Design Services:

IFABM has a team of certified welders who strive, daily, to make improvements to our procedures and processes that assure our customers receive a quality product on each and every order. Our ability to assist customers, with designs that help reduce manufacturing time while assuring the integrity of the finished product, is what separates our design staff from the competition.

As an authorized supplier of Danly, Lamina, and Lempco components, IFABM can meet virtually any guiding system requirement you may have.
