FAB & MACHINE INC.

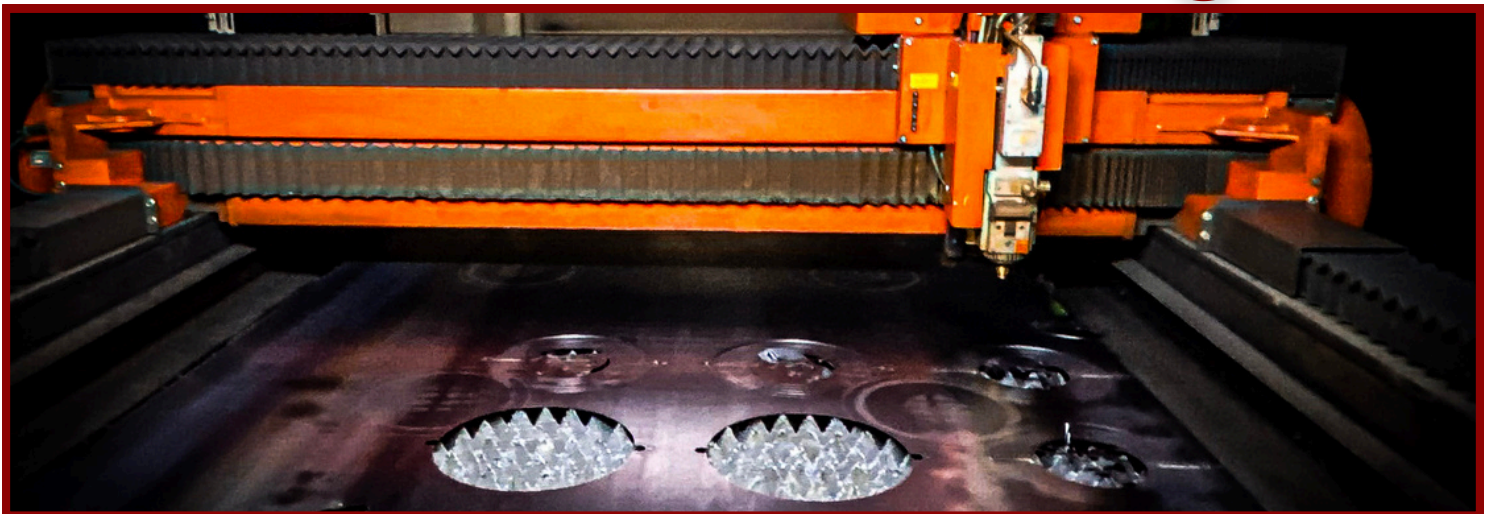

Division of BICO STEEL

LASER CUTTING SERVICES

Integrity Fab & Machine is proud to announce our new laser cutting services. We can cut mild steel, aluminum and stainless steel in various grades up to 0.5 inches thick on our 5' x 10' table. Whether you need just one part or a million parts, IFABM can provide exactly what you need. Additionally, we offer secondary operations, including bending, rolling, welding, machining, and painting. For inquiries, please contact a member of our sales team.
